The Inaugural Hackathon at KU

What is a hackathon?

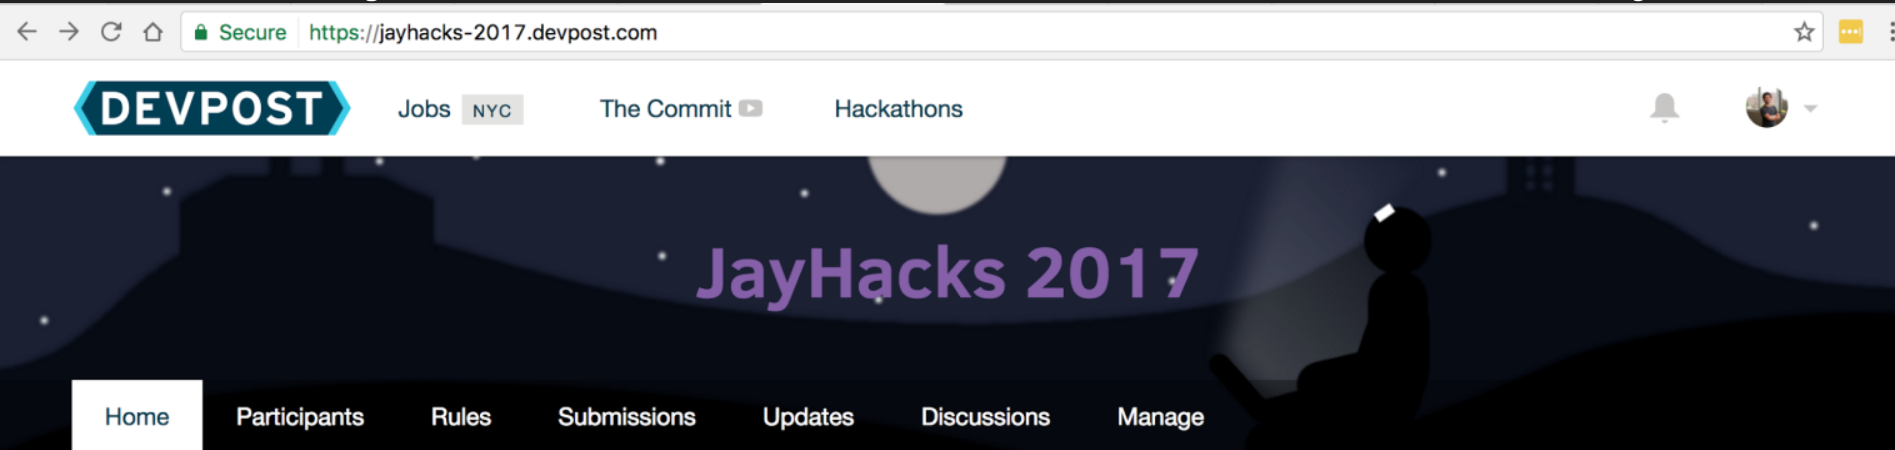

“Hackathons provide a venue for self-expression and creativity through technology. People with technical backgrounds come together, form teams around a problem or idea, and collaboratively code a unique solution from scratch—these generally take shape in the form of websites, mobile apps, and robots.”

Sleeping Rooms

- LEEP2 2420: Girls Sleeping Room
- LEEP2 2425: Guys Sleeping Room

If you need any other accommodations, just ask someone with a blue shirt.

Project Submissions - Due: 10 AM Sunday

JayHacks is the inaugural hackathon at the University of Kansas! Come join us for 36 hours of hacking at the University of Kansas Engineering Complex.

Our goal is to provide you with an environment that nurtures inspiration. Whether or not you end up submitting a project, we hope that you leave JayHacks with new tools in your problem solving repertoire!
